

January 5, 2015

Ryerson Customer:

We have received a request for information on products that we supply to your company that may contain any of the current chemicals considered as "substances of very high concern" (SVHC) and may also be present on the Restricted Substances List according to the European Union legislation known as REACH.

Ryerson

www.ryerson.com

Based on our review of the materials used to manufacture our products, none exceed the SVHC concentration threshold over 0.1% nor are present on the Restricted Substances List as of December 17, 2014 containing 161 substances. The stock material we supply, does not apply to REACH regulations and we are not consequently required to complete registration paperwork.

This letter is not applicable to our Aluminum Alloy Containing Lead Grade 6262. These products are not supplied for use in the European Union.

Please contact Ryerson if you have any further questions.

Sincerely,

Randy Opdyke
Ryerson Safety Committee
